April brought plenty of rain (5.4") and above average temperatures (63 avg. degrees vs 57 avg degrees in 2018). This has the bermudagrass coming along nicely. We always struggle with a few shaded, high traffic spots in the collars, which we may re-sod this month. A few weak greens areas will also be patched out after the aerification process (week of May 6<sup>th</sup>). Please check e-blasts and or the Pro Shop for golf schedules during aerification week. The entire golf course will be fertilized later this month once the bermudagrass reaches complete green-up.

We had CGA Agronomist Bill Anderson on April 30<sup>th</sup> for the yearly site visit. Many topics were discussed and a vast amount of information was shared. The new greens aerification program was discussed in detail and basically we will monitor the results over time. Certainly March and April conditions were a home run. We should have Mr. Anderson's report in the next month's newsletter.

Every year the Environmental Institute of Golf (EIFG), the philanthropic organization of the Golf Course Superintendents Association of America (GCSAA), organizes the fund raising efforts for turfgrass research named **Rounds 4 Research**. The format is bidding on rounds of golf on courses throughout the country and beyond. The auction dates are April 29 – May 5<sup>th</sup>. We have a poster in the men's locker room along with some business cards or you can check it out online. Please support the industry!
